OPERATING SYSTEM PROJECT PROPOSAL

Title: SOCKET PROGRAMMING ON LINUX

- Group chat application on Linux
- Client – Server Calculator on Linux
- File Transferring using sockets on Linux

Instructor: Ms. Anaum Hamid

Section: BCS-4J

Group Members:

1. Qasim Hasan (21k-3210)
2. Ahsan Ashraf (21k-3186)
3. Kantesh kumar(21k-3426)

Description:

Our project's main objective will be to gain a solid understanding of sockets communication through c programming on Linux. The activities described above will be prioritised first, and we'll be studying how multiple-user Clients interact with one another in a group. Second, we'll create a client-server calculator, and third, we'll use sockets to transmit files between users.

Tools, language and Utilities:
